## MADISON COLLEGE

# Construction & Remodeling

Build a solid future with a one-year technical diploma

madisoncollege.edu

*"This program really taught me everything I needed to do on a job site. It's great to learn in a classroom and then go out and actually do the work."*

- Jose, Construction and Remodeling graduate

## Hands-on learning

Employers are looking for skilled workers for both commercial and residential construction projects. Gain understanding of building materials, mastery of construction tools, knowledge of building codes and architectural drawings and much more. Most importantly you'll regularly put these new skills to work through a variety of projects.

Students tackle projects that have real community impact. Examples include a garden shed donated to Madison's Domestic Abuse Intervention Services shelter and a house built for a new community redevelopment. Every year, students build an energy-efficient home to be purchased by a community member.

*"There's nowhere else to get the training I want. And I like how small the class sizes are, 16 people at most!"*

- Brad, Construction and Remodeling graduate

## Apply your homework to your career

Here are a few of the courses you can expect while enrolled in the program:

- Construction and Remodeling Techniques
- Construction Codes and Regulations
- Construction Science
- Workplace Safety
- Plans, Site and Formwork
- Vocational Math
- Construction Drawing

## Graduate job-ready

Employers must adhere to safety and licensing registrations. We'll help prepare you with the certifications necessary for employment.

Upon successful completion of the Workplace Safety course, you'll earn your Occupational Safety and Health Administration certification (OSHA).

You'll earn your Dwelling Contractor Qualifier license upon achieving a C or better in Codes and Regulations. This license is a requirement of all contractors working in Wisconsin.

**89%** of Construction and Remodeling graduates find work within six months.

**\$2,613**

is the reported average monthly salary for program graduates.
